

## **ISnSC gets licensed to sell SSL & Digital Certificates in UAE by Telecommunications Regulatory Authority**

Dubai, UAE (1<sup>st</sup> February 2010) – ISnSC is now licensed as a Cryptography Service Provider by TRA; Telecommunications Regulatory Authority of UAE. License enables ISnSC to sell SSL certificates, email digital certificates as well as a wide range of high end encryption products.

ISnSC, as a leading information assurance research and development house, provide a full range of high end encryption and digital signature solutions. Being licensed by TRA, empowers ISnSC to provide digital certificates required for ISnSC's wide range of PKI solutions.

"We thank TRA for the trust in our Certificate Authority solutions that we provide in cooperation with Comodo CA," says Sherif Hazzaa, Managing Director of ISnSC. "this license dubs ISnSC as a full cryptography solution provider, offering Applications, Digital Certificates and Driver-Less Private Key containers."

ISnSC and Comodo CA came into agreement to outreach for the Middle East & African Markets out of their mutual confidence in each other's capabilities and the outstanding technical skills that are mainly geared towards customers satisfaction.

"We are excited about our cooperation with ISnSC and reaching out to the Middle East markets ," says Nilesh Patel, EMEA/APAC Business Development Sales Manager of Comodo CA. "with Comodo high encryption certificates issued by our 2048 root key and ISnSC's high end applications, I am confident we will be able to provide valuable services to our customers."
